

Full-Stack Web Developer

TeamMeUp builds computational team formation solutions for the video games industry. Based on optimization algorithms and social science research, we help game developers and managers build high-performing teams that thrive together.

Responsibilities

- Looking for a talented and proactive full-stack web developer to join our small, fast-moving team.
- Design and develop a user-friendly web platform that allows end-users to interact with our algorithms
- Ensure the platform is scalable and well-tested
- Work with: React, TypeScript, Prisma, PostgreSQL, AWS Cognito, AWS, Heroku. Bonus: GraphQL, Next.js, or Docker.

Benefits

- Competitive compensation
- A chance to work at the intersection of tech, gaming, and matchmaking
- Will play a key role in building our web platform's MVP, with the goal of launching within 2 months.
- A dynamic, positive, and collaborative team environment
- Choice to work at Utrecht Inc. or Remotely
